Communications to the Editor are indicated by the letter C following the page number.

Absorption spectra of superoxide ions, 1045
Abstraction, of Br from Br_2 by i-C_3F_7 radicals, 1329
—, of Cl atoms from carbon tetrachloride by cyclopentyl radicals, 905
—, of H· and D· atoms from HI, DI by t-butyl (C_4H_9·) radical, 1307
—, of H and D atoms from H_2O (D_2O) by CF_3 radical, 835
—, of H atom by I atom in methyl fluoride, rate constant of, 569
—, of H atoms by O(^3P) from saturated hydrocarbons, rate constant T dependences, 705
—, of H atoms from cyclopentane by trichloromethyl radicals, 905
—, of H atoms from HCN by C_2F_5 radicals, 187
—, of H from HBr by i-C_3F_7 radicals, 1329
Activation of reaction vessel, 845
Active role by reaction vessel, 63
Addition, mechanism of electrophilic bromination of alkenes, 249
Addition of alkyl radicals to carbonyl groups, 281
Alkyl effect, at the acyl carbon of ethyl ester pyrolyses in the gas phase, 455
Amperometric setup for measurements of high bromination rate constants, 855
Anchimeric assistance, of carbonyl group in gas-phase pyrolysis of 5-chloropentan-2-one and 4-chloro-1-phenylbutan-1-one, 1275
—, of the carbonyl group in the gas-phase pyrolysis of ethyl 4-bromobutyrate, 795
Aromatic substitution, mechanism of electrophilic bromination, 249
Arrhenius parameters for ethylbenzene pyrolysis, 469

Base-catalyzed hydrolysis, 1099
BEBO calculations for T dependences of rate constants, (O^3P) with saturated hydrocarbons, 705
Belousov-Zhabotinskii oscillator, 1335(C)
Benzene photochlorination, 119
Bond dissociation energies, in metal–alkyl compounds, 167
Bond dissociation energies (C—Cl) in chlorofluoromethanes, 569
Bond dissociation energies in fluoromethanes, 569
Bond dissociation energies in GeH_4 and GeH_3I, 561
Bond dissociation energy of monogermane, 547
Bond strengths of sulfur species, 941(E)
Branched-chain reaction, of acetylene with chlorine, induced by small additions of oxygen, mechanism of, 1
N-brominated alanine, decomposition, 1321
Bromination, mechanism of electrophilic addition and substitution, 249
Bromination of highly reactive enol ethers, kinetics by amperometry, 855
Bromine, kinetics of reaction with i-C_3F_7 radicals, 1329

Calcitriol, 1α,25-dihydroxycholecalciferol, vitamin D_3 metabolite, 381
Carbamate, 1147
Carbon dioxide, 1147
Catalytic conversion of syngas to paraffins and olefins, 759
C—C bond scission in propane, 63
i-C_3F_7 radicals, kinetics of reactions with Br_2 and HBr, 1329
Chain length, 845
Charge transfer, role in electrophilic bromination, 249
Chemical activation, in oxygen-accelerated chlorination of acetylene, by three-body reaction, 1
Chlorine atoms, recombination rates, in flash photolysis, 1235(C)
Cl and Br, kinetics of reactions of, with H_2O_2, 1311
—, kinetic study of reactions with hydrogen peroxide, 1311
CN, reactions of, 1237(C)
CN broad band absorption, 915, 1237(C)
Complex rate law, for the cerium(IV) oxidation of glycolic acid, 417
Criegee intermediate, 655
Cycloalkanols, 925

Decomposition, of metal–alkyl compounds, 167
—, of oxetan and oxetan-2,2-d_2 in the gas phase, 505
Decomposition kinetics of ethylbenzene, 469
Decomposition of alkyl isocyanates, 609
Decomposition of N-brominated alanine, 1321
Decomposition of t-butoxy radicals, of hexafluoro-t-butoxy radical, 293
Dehydrochlorination, of 1,1,1-trichloroethane, CO_2 laser photosensitized reaction, 1119(C)
Diethanolamine, 1147
Diffusion coefficient, gas-phase measurement of, for labile species, 1081
Diffusion effects on the self-termination kinetics of isopropylol radicals in solution, 733
Discharge flow technique, application to F + 1,2-dibromo-1,1,2-trifluoroethane, 891
Dissociation energy of OH bond in t-BuO_2-H, 815

Electron affinity of SF_6, 109
Electron transfer kinetics, 867

—, of reaction *tris*(dimethylglyoximato)-nickelate(IV) hexacyanoferrate(II), 823
Electron transfer reactions, 881, 945
Electrophilic bromination, mechanism of, 249
Elimination, of ethyl 4-bromobutyrate in the gas phase, 795
—, of ethyl 3-methylbutanoate and ethyl 3,3-dimethylbutanoate in the gas phase, 455
Enthalpy of formation of ether, 63
Equilibrium constant, for alcohol–NO_2, 647
Errata, 503, 941
Ethyl–ethyl combination and disproportionation, 845
Ethyl–ethyl reactions, 845
Explosion, of acetylene–chlorine mixture, initiated by small additions of oxygen, mechanism of, 1

Fast flow system, EPR–LMR spectrometer, NF_2 reactions with O, N, H atoms, 399
Flash photolysis, 1111
Formation of methyl iodide, 1031
Fuel-nitrogen chemistry, 915, 1237(C)

Gas kinetics of hexachlorocyclopropane, 1179
Gas-phase kinetics, 1111
Gas-phase titration, 1127
Gas purification, 1147

HCN, reactions of, 1237(C)
Heat of formation, of HO_2, 341
—, of HO_2, and the oxidation of HI at low temperatures, 323
—, of 2-methyl-2-pentyl radicals, 1133
Heat of formation of t-C_4H_9 radical, $\Delta H°_f(t\text{-}C_4H_9)$, 1307
Heterogeneous intervention, 63
Hexafluoropropene, cyclodimerization of, 537
—, dimerization of, 537
—, high-pressure kinetics of, 537
—, kinetics of, 537
High pressure, 805
Homogeneous catalysis of Mn(II) ions in bromate oxidation of pinacol, 307
Homogeneous process characterized by multiple termination, 63
Hydrocarbon, 475
Hydrogen abstraction, 1111
Hydrogenation of butene-2-*cis*, 5
Hydrogen bromide, kinetics of reaction with i-C_3F_7 radicals, 1329
Hydrogenolysis of butene-2-*cis*, 5
Hydrogen peroxide, kinetic study of reactions with Cl and Br, 1311
Hydrolysis of some diazoacetophenones in aqueous dioxan, 25
Hydrolysis reactions, 1099
Hydroxyacids, 925
Hydroxyl radical, rate constants, for gas phase reactions of, with a series of cycloalkenes, 1161
—, reactions, gas phase, of, with a series of cycloalkenes, 1161

Identification of kinetic parameters, 119
Induced heterogeneity, 63
Intramolecular isotope effect in ester pyrolysis, 461
Iodination of GeH_4, kinetics of secondary reactions, 561
Iodine substitution effect on the Ge—H bond dissociation energy, 561
Ion pair, mechanism in the gas-phase pyrolysis of ethyl 4-bromobutyrate, 795
—, mechanism of gas-phase pyrolysis of 5-chloropentan-2-one and 4-chloro-1-phenylbutan-1-one, 1275
IR spectrum, of HNO_3, 647
Isomerization, of 1-hexene on HY zeolite, 1249
Isomerization of butene-2-*cis*, 5
Isomerization of hexachlorocyclopropane, 1179

Kinetic analysis, of extended series of first-order reactions in sulfuric acid, 697
Kinetic and mechanistic study on the oxidation of nitrite by peroxomonophosphoric acid, 989
Kinetic model, 119
Kinetics, 83, 677, 925, 1147
—, electron transfer, of reaction *tris*(dimethylglyoximato)nickelate(IV) and hexacyanoferrate(II), 823
—, of oxidation of naphthols by alkaline hexacyanoferrate(III), 197
—, of reaction F + 1,2-dibromo-1,1,2-trifluoroethane, 891
—, of the cerium(IV) oxidation of glycolic acid, 417
—, of the reaction of methyl mercaptan with iodine, 433
—, of the reactions of O_3 and OH radicals with furan at 298 ± 2 K, 51
—, of the reactions of O_3 and OH radicals with thiophene at 298 ± 2 K, 51
—, third-order term in in bromination, 249
Kinetics and energetics of the thermal isomerization of, calcitriol, 381
Kinetics and equilibria in the system Br + t-BuO_2H ⇌ HBr + t-BuO_2, 815
Kinetics and mechanism, of oxidation of alanine and phenylalanine by chloramine-B in acid medium, 775
Kinetics and mechanism of 1,2- and 1,4-cycloadditions, 805
Kinetics ESR spectroscopy, 267
Kinetics of inorganic cations in aqueous solution, 867
Kinetics of oxidation of meta- and para-substituted phenyl methyl sulfoxides by chloramine-T, 129
Kinetics of oxidation of pinacol catalyzed by bromate manganous, 307
Kinetics of reaction between methane and iodine, 1031
Kinetics of secondary reactions in the iodination of CH_4, 561
Kinetics of secondary reactions in the iodination of GeH_4, bond dissociation energies, 561
Kinetics of thermal decomposition, 609
Kinetic study, of peroxomonosulfate, 1301

Lifetime of SF_6, 109
Light hydrocarbons from syngas, 759
Long-chain approximation, 219

Mathematical modeling, 475
Mechanism, of oxidation of HCl and HBr at high temperatures, heat of formation of HO_2, 341

—, of reaction F + 1,2-dibromo-1,1,2-trifluoroethane, 891
Mechanism of electrophilic bromination, 249
Mechanism of oxidation of nitrite by peroxomonophosphoric acid, a kinetic study, 989
Mechanism of pinacol oxidation catalyzed by $HBrO_3$ manganous, 307
Mechanism of reaction of H_2 with butene-2-*cis*, 5
Mechanism of thermal decomposition, 609
Mesomeric effect, of multiple-bonded or π-bonded substituents, 205
Metal–alkyl compounds, bond energies, 167
Methyl thiirane, 1127
Modeling, 677

Neighboring group participation, in gas-phase pyrolysis of 5-chloropentan-2-one and 4-chloro-1-phenylbutan-1-one, 1275
—, in the gas-phase pyrolysis of ethyl 4-bromobutyrate, 795
Nickel(IV) chemistry, 945
NMR investigation of thermal isomerization of, calcitriol, and kinetics and energetics, 381

Olefin hydrogenation, hydrogenolysis, and thermal reaction with hydrogen, 5
Oxidation, 925, 997
—, of alanine and phenylalanine by chloramine-B, 775
—, of glycolic acid by cerium(IV), a complex rate law for, 417
—, of HCl and HBr at high temperatures, mechanism and heat of formation of HO_2, 341
—, of HI at low temperatures and the heat of formation of HO_2, 323
—, kinetics of, substituted methyl sulfoxides, by chloramine-T in buffered ethanol–water, 129
—, osmium(VIII)-catalyzed, of proline and methionine by hexacyanoferrate(III), 669
Oxidation in aqueous media, 881
Oxidation of alkenes and alkynes by Tl(III) uncatalyzed and Ru(III) catalyzed, 587
Oxidation of pinacol by acid bromate manganous catalysis, 307
Oxidation of 2-propanol, 1301
Oxidation of tris(dimethylglyoximato)-nickelate(IV), 521
Oxidative decarboxylation, 925
Ozone reaction, 655

Parameter estimation, 677
Perfluoroisopropyl radicals, kinetics of reactions with Br_2 and HBr, 1329
Peroxomonosulfate, 1301
Photochemical decomposition, with peroxomonosulfate, 1301
Polar effects. of electron-withdrawing substituents in gas-phase pyrolyses of 1-substituted ethyl acetates, 205
Prima facie evidence, 845
Primary isotope effect in the metathesis reaction of t-C_4H_9 with HI, DI, 1307
Products of CS_2 + OH in the presence of O_2, 631
Pseudo-first-order kinetics, solvent isotope effects, acetal hydrolyses, 235
Pyrolysis, of ethylbenzene, 469
—, of ethyl 4-bromobutyrate, 795
—, of ethyl 3-methylbutanoate and ethyl 3,3-dimethylbutanoate, 455
—, of trifluoromethyl peroxide, 605
Pyrolytic dehydration and its relation to melting process, 141

Radical recombinations, 845
Radical termination kinetics, 267
Radiochemical methods, 1031
Rate, of oxidation of glycolic acid by cerium(IV), a complex law for, 417
Rate coefficients, 503(E)
Rate constant, for F + 1,2-dibromo-1,1,2-trifluoroethane, 891
Rate constant of OH and acetone, 579
Rate constants, for alcohol–NO_2 reaction, 647
—, for gas-phase reactions of ozone with a series of cycloalkenes, 721
—, for reaction of hydrazine with ozone, 619
—, for reaction of OH with methyl nitrite, 619
—, for reaction of O_3 with furan and thiophene at 298 ± 2 K, 51
—, for the gas-phase reactions of OH radicals with a series of bi- and tricycloalkanes, 37
—, for the gas-phase reactions of OH radicals with a series of α,β-unsaturated carbonyls, 75
—, for the reaction CS_2 + OH in the presence of O_2, 631
—, for the reaction of OH radicals with furan and thiophene at 298 ± 2 K, 51
Reaction, 83
—, the thermochemistry and kinetics of methyl mercaptan with iodine, 433
Reaction mechanism, 475, 997
Reaction of nitrogen dioxide and water vapor, 1013
Reactions, of CN, 915
—, gas-phase, of OH radicals with a series of bi- and tricycloalkanes at 299 ± 2 K, 37
—, gas-phase, of OH radicals with a series of α,β-unsaturated carbonyls, 75
—, gas-phase, of ozone with a series of cycloalkenes, 721
—, of H_2, 915
—, of OH and alkanes, 503(E)
Reactions with oxygen, 1031
Redox reaction kinetics, 867
Resonance fluorescence, 1111
Ring strain, effect of, on rate constants for gas-phase reactions of ozone with a series of cycloalkenes, 721
RRKM calculations, 1069

Saturated hydrocarbon–$O(^3P)$ reactions, theoretical rate constant T dependences with BEBO method, 705
Secondary methane, 845
Sensitivity analysis, 475, 677
Sensitivity analysis in chemical kinetics, 959
Shock waves, 915, 1237(C)
Smog chamber, 1013
Spotted-flow, 1147
Steric acceleration, of alkyl-substituents in gas-phase pyrolyses of 1-substituted ethyl acetates, 205
Steric factor, of alkyl groups at the β-carbon of ethyl acetate pyrolyses, 205
Structure–reactivity correlations, 1099
Sucrose hydrolysis, energy of activation and temperature for (C), 1229

Superoxide ion, kinetics of protonation of by water and ethanol, 1057
Superoxide ion reactions, 1063
—, equlibrium constants for, with ethyl acetate, 1063
Superoxide ions, 1045
Superoxide ions in solutions, kinetics of, 1057

Technique of induced heterogeneity, 845
Thermal decomposition, 475
Thermal isomerization of previtamin–vitamin reaction, and kinetics and energetics, 381
Thermal reaction of butene-2-*cis* with hydrogen, 5
Thermochemical kinetics, 219
Thermochemistry, 1069
—, of oxidation of HCl and HBr at high temperatures, 341
—, of oxidation of HCl and HBr at high temperatures and heat of formation of HO_2, 341
—, of sulfur species, 941(E)
—, of the reaction of methyl mercaptan with iodine, 433
Thermolysis, 219
Third-order kinetics in bromination, 249
Titration, of F atoms with Cl_2, 891

Unimolecular reactions, 1069

Vibrationally excited OH, energy transfer, 151
VLPP, of metal–alkyl compounds, 167

Index of Compounds to Volume 15

Acetone + OH rate constant, 579
Acetonitryl, 1063
3-Acetoxy-2-butanones, gas phase elimination kinetics of, 205
2-Acetoxypropionitrile, gas phase elimination kinetics of, 205
Addition of alkyl radicals to carbonyl groups, 281
Alanine, kinetics of oxidation of, by chloramine-B, 775
Alcohols, nitration by NO_2, 647
Alkenes and alkynes oxidation by Tl(III) uncatalyzed and Ru(III) catalyzed, 587
Alkyl, 609
Alkylnitrites, formation by nitration of alcohols, 647
Azocyclopentane, photolysis of, in the presence of cyclopentane and carbon tetrachloride, 905

Bicyclo[2.2.1]-2,5-heptadiene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
Bicyclo[2.2.1]-2-heptene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
Bicyclo[2.2.2]-2-octene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
Bis-trifluoromethyl peroxide, C—O bond dissociation energy in, 605
—, reexamination of pyrolysis, 605
Bromate oxidation of pinacol catalyzed by manganous ions, 307
Bromine atoms (Br), 1311
Bromine reaction with t-BuO_2H, 815
t-BuO_2H reaction with Br, 815
n-Butane, 845
cis-2-Butene, rate constant for the gas phase reaction with ozone, 721
t-Butoxy radical, decomposition of, 293
t-Butyl radical, absolute rate constants for abstraction reaction with HI, DI, primary, 1329
—, isotope effect, standard heat of formation and entropy, 1329

Calcitriol, kinetics and energetics of thermal isomerization of, by NMR, 381
Carbonyl groups, addition of alkyl radicals to, 281
Carboxylic gases, 1099
Cerium(IV), 925
Cerium(IV) sulfate, complex rate law for the oxidation of glycolic acid by, 417
CF_3 radical, reaction with H_2O (D_2O), 835
C_2F_5 radicals, reaction with HCN, 187
Chlorine, as titrant for fluorine atoms, 891
Chlorine atoms (Cl), 1311
1-Chloro-2-acetoxypropane, gas phase elimination kinetics of, 205
4-Chloro-1-phenylbutan-1-one, gas phase pyrolysis of, 1275
5-Chloropentan-2-one, gas phase pyrolysis of, 1275
CH_3SH, thermochemistry and kinetics of the reaction of, with iodine, 433
CS_2, reaction with OH, 631
Cyanoalkyl radicals, 267
Cycloheptene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
1,3-Cyclohexadiene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
1,4-Cyclohexadiene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
Cyclohexene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
1,3,5-Cyclooctatriene, 1069
1,3,6-Cyclooctatriene, 1069
Cyclopentane-α-hydroxyacid, 925
Cyclopentanol, 925
Cyclopentene, rate constant for the gas phase reaction with hydroxyl radical, 1161
—, rate constant for the gas phase reaction with ozone, 721
Cyclopentyl radicals, reaction with carbon tetrachloride, 905

1,2-Dibromo-1,1,2,2-tetrabromoethane, chromatographic analysis for, 891
1,2-Dibromo-1,1,2-trifluoroethane, reaction with fluorine atoms, chromatographic analysis for, 891
Diethanolamine (DEA), 1147
1,2-Dihydronaphthalene, 219
1-α, 25-Dihydroxycholecalciferol, kinetics and energetics of thermal isomerization of, by NMR, 381
1-Dimethylamino-2-acetoxypropane, gas phase elimination kinetics of, 205
Dimethyl formamide, 1063
β-Dimethylstyrene + OH rate constants, 579
β-Dimethylstyrene photooxidation mechanism, 579
Dimethyl sulfoxide, 945
—, oxidation by *trans*-dihydroxotetraoxoosmate(VIII), 881
Disaccharides, 141

Electron, absorption by SF_6, 109
Enol acetate, 855
Enol ethers, 855
Ethyl acetate, 1063
Ethane, 1111
Ethylbenzene, rate of decomposition of, 469
Ethyl 4-bromobutyrate, gas phase pyrolysis of, 795
Ethyl 3,3-dimethylbutanoate, pyrolysis or gas elimination of, 455
Ethylene, 845
Ethyl 3-methylbutanoate, pyrolysis elimination of, 455
Ethyl-vinyl ether, 855

Fluorine, kinetics of reaction with 1,2,-dibromo-1,1,2-trifluoroethane, determination of concentration by chemiluminescent titration with Cl_2, 891
—, reaction with hexafluoro-2-methyl isopropanol, 293
1-Fluoro-2-acetoxypropane, gas phase elimination kinetics of, 205
Formic acid, 1335

GeH_4, kinetics of secondary reactions in the iodination of, effects of iodine substitution on the bond dissociation energy of, 561
GeH_3I, formation in the iodination of GeH_4, iodine effect on the Ge—H bond dissociation energy, 561
Germane, tetramethyl, decomposition and bond energy, 167
Glycolic acid, complex rate law for the cerium(IV) oxidation of, 417

HBr, mechanism and thermochemistry of oxidation of, 341
—, and HCl at high temperatures and the heat of formation of HO_2, 341
HCl, mechanism and thermochemistry of oxidation of, 341
—, and HBr at high temperatures and the heat of formation of HO_2, 341
Hexachlorocyclohexane isomers, 119
Hexachlorocyclopropane, 1179
Hexacyanoferrated(III), oxidation by, of naphthols, kinetics of oxidative coupling, 197
Hexafluoroacetone, addition of methyl radicals to, 281
Hexafluoro-2-methyl isopropanol, reaction with F_2, 293
Hexafluoropropene, 537
Hexafluoro-*t*-butoxy radical, decomposition of, 293
—, formation of, 281
Hexacyanoferrate(II), reaction with *tris*-(dimethylglyoximato)nickelate (IV), 823
1-Hexene, isomerization of, 1249
HI, oxidation of, 323
—, at low temperatures and the heat of formation of HO_2, 323
HO_2, heat of formation of, 341
—, and mechanism and thermochemistry of oxidation of HCl and HBr at high temperatures, 341
HO_2, heat of formation of, 323
—, and the oxidation of HI at low temperatures, 323
Hydrazine, reaction with ozone, 619
Hydrogen, 845
Hydrogen cyanide, hydrogen abstraction by radicals C_2F_5 from, 187
Hydrogen peroxide (H_2O_2), 1311
Hydroperoxyl radical (HO_2), 1311
Hydroxyl radical, 151, 1111
—, rate constants for gas phase reactions with a series of cycloalkenes, 1161

Iodine, 941
—, kinetics of reaction with methane, 1031
Iodogermane, kinetics of formation from iodine and germane, 547
Isocyanates, 609
Isopropylol radicals in solution, effects of diffusion on the self-termination kinetics, 733
I_2, thermochemistry and kinetics of the reaction of CH_3SH, 433

Lead, tetraethyl, decomposition and bond energy, 167
Lindan, 119

Manganous catalysis in bromate oxidation of pinacol, 307
Mesitonitrile, kinetics of reaction in sulfuric acid, 697
Methane, 845
—, kinetics of reaction with iodine, 1031
p-Methoxystyrene, 805
Methyl 2-acetoxypropionate, gas phase elimination kinetics of, 205
Methyl fluoride, kinetics of reaction with I_2, 569
Methyl mercaptan, 941
Methylnitrite, reaction with OH, 619
2-Methyl-2-pentyl radicals, heat of formation of, 1133
Methyl radicals, addition to hexafluoroacetone, 281
Monogermane, bond dissociation energy of, 547
—, kinetics of reaction with iodine, 547

Naphthols, oxidation of, by alkaline hexacyanoferrated(III), kinetics of oxidative coupling, 197
Nitric acid, IR absorption spectrum, 647
Nitric oxide, 1013
Nitrite, kinetics and mechanism of oxidation by peroxomonophosphoric acid, 989
Nitrogen, 845
Nitrogen dioxide, 1013
Nitrous acid, 1013

$\dot{O}_2^-$, 1045, 1057, 1063
OH bond dissociation energy in *t*-BuO_2H, 815
OH radical, nonphotolytic source, 619
OH, reaction with CS_2, 631
$O(^3P)$ reactions with saturated hydrocarbons, theoretical rate constant T dependences with the BEBO method, 705
Osmium(VIII) catalyzed oxidation, of proline and methionine by hexacyanoferrate(III), 669
OSSO, 1127
Oxohydroxonickel(IV), 945
Oxygen, effect on kinetics of the reaction between methane and iodine, 1031
Oxygen, reactions, 997
Ozone, rate constants for the gas phase reactions with a series of cycloalkenes, 721
—, reaction with hydrazine, 619

Peroxomonophosphoric acid, oxidation of nitrite, kinetic study, 989
Peroxomonosulfate, 1301
1-Phenyl-3-acetoxybutane, gas phase elimination kinetics of, 205
1-Phenyl-2-acetoxypropane, gas phase elimination kinetics of, 205
Phenylalanine, kinetics of oxidation of, by chloramine-B, 775
Phosphine, trimethyl, decomposition and bond energy, 167
Pinacol oxidation by acid bromate catalysis of Mn(II) ions, 307
Propanal, reactions of, 997
Propane, 845, 1111
2-Propanol, oxidation of, 1301

S, 1127
S_2, 1127
SF_6, electron affinity, 109
—, lifetime, 109
SO, 1127
Stibine, triethyl, decomposition and bond energy, 167

Sulfoxides, meta- and para-substituted phenyl methyl, kinetics of oxidation in buffered ethanol water, 129
Sulfuric acid, kinetic analysis of extended sequence of reactions in, 697
Sulfur species, 941

Tertiary amines, 1099
Tetrabromoethane, chromatographic analysis for, 891
Tetracyanoethylene, 805
Toluene, rate of formation from ethylbenzene, 469
trans-1,2-Dichloroethene, 655
1,1,1-Trichloro-2-acetoxypropane, gas phase elimination kinetics of, 205
Trifluoromethylperoxy radical, heat of formation and C—O bond dissociation energy in, 605
Trichloromethyl radicals, reaction with cyclopentane, 905
2,4,6-Trinitrophenyl acetate, 1099
Tris(dimethylglyoximato)nickelate(IV), copper(II)-catalyzed, oxidation of phenylhydrazine by, 867
Tris(dimethylglyoximato)nickelate(IV), reaction with hexacyanoferrate (II), 823

Vinyl chloride, 655
Vitamin D_3 metabolite, kinetics and energetics of thermal isomerization of, by NMR, 381

Water, hydrogen abstraction by CF_3 from, 835
Water vapor, 1013

Zeolite bifunctional catalysts for converting syngas to light hydrocarbons, 759
